

Army Medical Department

Part-time Anesthesiology Physician

US Army Reserve Health Care Team

The Army Medical Department is currently seeking healthcare professionals, in critical specialties, to serve part-time in the Reserves. Anesthesiologists are one of our critical needs, and the US Army Reserves would allow you the opportunity to maintain your civilian career while providing care for Soldiers and their families on a part-time basis.

We will consider ages up to 60 years old! In fact, the vast majority of applicants we receive are established in their careers looking for opportunities to give back to their country. We also have programs for residents, and special units designed for medical professionals that allow you flexibility in the way you serve. We have some fantastic benefits that may interest you:

FULLY LICENSED:

- Student Loan Repayment up to \$250,000 PLUS Annual Bonus
- Commissioned as a medical officer (Ranks are based off education and experience level)
- Monthly Drill Pay
- Retirement Programs
- Tricare Reserve Health Insurance

RESIDENTS:

- Monthly Stipend of approximately \$2400 (Nearly \$28,000 additional income while completing residency)
- Student Loan Repayment up to \$250,000
- Minimal "Army" requirements in residency. Focus on your profession, and serve your time back after residency is completed.
